INDEX TO VOLUME SEVENTEEN

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

Acatalasia, 235
Acetylcholine, effect of temperature on action, 66
Acid-base balance, foetal, 116
—— in hypothermia, 54
Adrenal, foetal, development and regression, 93
Adrenals, effects of hypothermia on, 58
Adrenocorticotrophic hormone, inhibition in hypothermia, 57
Afibrinogenaemia, 218
Agammaglobulinaemia, 218
Albumin, double, 221
Alder-Reilly anomaly of leucocytes, 194
ALEXANDER, D. P. & NIXON, D. A.: The foetal kidney, 112
Aminoaciduria, 224
— benign familial, 225, 227
β-Amino*iso*butyric aciduria, 225, 227
AMOROSO, E. C.: Histology of the placenta, 81
Anaesthesia during hypothermia, 33
Analbuminaemia, 217
Androgens, exogenous, effects on developing foetus, 92
Anoxia, effect on glycogen in tissues, 142
— experimental, in new-born, 169
— survival ability of young mammals, 144
Antibodies, placental transfer, 97
Antigens, inert, tolerance of, 102
Aortico-pulmonary glomus, inferior, 127
Arginosuccinic aciduria, 225, 227
Arrhythmias due to hypothermia, 50
Asphyxia, perinatal, 168

Bayliss, L. E.: *Principles of general physiology*, 5th ed., vol. 2, 176
BIGELOW, W. G. & SIDLOFSKY, S.: Hormones in hypothermia, 56
Biochemical changes in exposure and acclimation to cold environments, 25
Biographical notes on contributors, 74, 173, 260
Birds, hibernation in, 9, 11
Bishop, W. J.: *Early history of surgery*, 77
Blood, circulation, changes at birth, 148
— cooling, direct, in induced hypothermia, 34
— flow: *Blood flow in arteries*, 76
—— effects of cooling on, 14
—— effects of induced hypothermia on, 49
— pressure, in new-born baby, 154
—— resemblances between relatives, 244
Book reviews, 76, 175, 262
BOYD, J. D.: The inferior aortico-pulmonary glomus, 127
Brain, effects of hypothermia on, 61
— local cooling techniques, 63
— tolerance to cold, 62
BRAMBELL, F. W. R., *see* HEMMINGS, W. A., 96
BROWN, H. L., *see* Penrose, L. S., 262
BURN, J. H.: Effect of temperature on the response to drugs, 66

Carbohydrate metabolism in acclimation to cold, 27
—— in exposure to cold, 25
—— in foetus, 122
—— in placenta, 122
Carbon dioxide balance in hypothermia, 54
CARTER, C. O.: Inheritance of congenital pyloric stenosis, 251
Cells, hypothermic, radiosensitivity, 71
Charles, Sir J., *see* Spence, Sir J., 78
Chediak-Steinbrinck anomaly of leucocytes, 194
Choline acetylase, effect of temperature on action, 67
Cholinesterases, 230
Chromatin, sex, relation to X chromosomes, 196
Chromosomes, abnormalities, types, 179
— anomalies in ovarian dysgenesis syndromes, 203
— in neoplastic conditions, 183
— mosaicism, 182
— sex, abnormalities, 182, 206
——— incidence, 211
Chromosomes, X, indirect assessment, 196
Ciba Foundation Symposium on Biochemistry of Human Genetics, 262
Circulation: *Blood flow in arteries*, 76
— changes at birth, 148
— effects of induced hypothermia on, 48
— extra-corporeal, combined with hypothermia, 35
— neonatal, 156
CLARKE, C. A., *see* EVANS, D. A. P., 234
Climate, adaptation to, 22
Cold, acclimation to, biochemical changes, 25
—— body reserves in, 27
— acclimatization in poikilothermic animals, 5
— climatic, acclimatization to, 21
— *Cold injury*, 77
— continued, physiological effects, 19
— effects: introduction to symposium, 1
— exposure to, biochemical changes, 25
— induced, acclimation, 20
— metabolic response in new-born animal, 165
— resistance of poikilothermic animals to, 5
Colour-blindness as sex chromosome marker, 197
Congenital disease, frequency, 254
Contributors, biographical notes on, 74, 173, 260
Cooling, effects on blood flow, 14
— effects on muscles, joints and tendons, 16
— effects on nerves, 17
— local, in man, 14
COOPER, K. E.: The circulation in hypothermia, 48
— & ROSS, D. N.: *Hypothermia in surgical practice*, 76
Copeman, W. S. C.: *Doctors and disease in Tudor times*, 78
CROSS, K. W.: Respiration in the new-born baby, 160
Cystathioninuria, 225, 227
Cystinosis, 225, 227
Cystinuria, 224, 225
Cytogenetics, human, 179

DAVIDSON, W. M.: Inherited variations in leucocytes, 190
DAVIS, J. A. & TIZARD, J. P. M.: Practical problems of neonatal paediatrics considered in relation to animal physiology, 168
DAWES, G. S.: Changes in the circulation at birth, 148
DEANESLY, R.: Foetal endocrinology, 91
Dehydration, influence on cold-hardiness, 7
DEPOCAS, F.: Biochemical changes in exposure and acclimation to cold environments, 25
DREW, C. E.: Profound hypothermia in cardiac surgery, 37
Drug response, effect of temperature on, 66
Drugs, actions, genetic differences, 234
Ductus arteriosus, closure after birth, 150

EDHOLM, O. G.: Hypothermia and the effects of cold: introduction to symposium, 1
Electroencephalogram in hypothermia, 61
Embryo, enzymic activity, 118
Endocrine changes in hypothermia, 57
Endocrinology, foetal, 91
Enzymes, synthesis in embryo, 118
Enzymic activity during early development, 118
EVANS, D. A. P. & CLARKE, C. A.: Pharmacogenetics, 234

FAIRLEY, H. B.: Metabolism in hypothermia, 52
Falconer, D. S.: *Introduction to quantitative genetics*, 262
Fat metabolism in acclimation to cold, 28
—— in exposure to cold, 26
Fibrillation, effect of temperature on, 68
Finger-print patterns, quantitative genetics, 247
Foetal and neonatal physiology: introduction to symposium, 81
Foetus, acid-base balance, 116
— carbohydrate metabolism in, 122
— circulation in, 148
— diuresis and antidiuresis, 115
— endocrinology, 91
— kidney, 112
— mineral metabolism, 132
— *Oxygen supply to the foetus*, 175
— respiratory reflexes, 162
— transport mechanisms, 107
— urine, composition, 113
Foramen ovale, closure after birth, 152
FORD, C. E.: Human cytogenetics, 179
FOX, R. H.: Local cooling in man, 14
Freezing, avoidance among poikilotherms, 6
— tolerance, 7
— and drying: *Recent research in freezing and drying*, 76
Fructose, comparative distribution in foetal fluids, 124
— fate and function, 125
— placental, 122

Galactosaemia, 213, 225, 226
Genetics: *Ciba Foundation Symposium on Biochemistry of Human Genetics*, 262
— *Human biochemical genetics*, 262
— Human genetics: introduction to symposium, 177
— *Introduction to medical genetics*, 2nd ed., 262
— *Introduction to quantitative genetics*, 262
— *Natural selection in human populations*, 262
— *Outline of human genetics*, 262
— *Recent advances in human genetics*, 262
Glomus, aortico-pulmonary, inferior, 127
Glycogen, distribution in foetal tissues, 137
— placental, 122, 125
— reserves, and their changes at birth and in anoxia, 137
Glycinuria, 225, 227
Gonadectomy, foetal, effects on accessory organs, 92
Growth: *Human growth*, 262

Haemopoietic system in hypothermia, radiosensitivity, 71
Haptoglobins, 218
Harley, H. R. S. (editor): *Modern trends in surgery*, 77
HARNDEN, D. G. & JACOBS, P. A.: Cytogenetics of abnormal sexual development in man, 206
HARRIS, H.: Inherited variations of human plasma proteins, 217
— *Human biochemical genetics*, 262
Harrison, G. A., *see* Roberts, D. F., 262
HART, J. S.: Physiological effects of continued cold on animals and man, 19
Hartnup syndrome, 225, 227
Heart, arrhythmias in hypothermia, 50
— artificial, use in hypothermia, 35, 37
— changes at birth, 148
— effects of hypothermia on, 48
— glycogen before and after birth, 138
— output in hypothermia, 49
— oxygen consumption in hypothermia, 53
— surgery: *Modern trends in cardiac surgery*, 77
—— profound hypothermia in, 37
Heart-lung machine and induced hypothermia, 35
—— comparison with profound hypothermia in cardiac surgery, 42
Heat balance in homoeothermic mammal, 164
HEMMINGS, W. A.: Protein transfer across the foetal membranes, with foreword by F. W. R. Brambell, 96
Hereditary disease, frequency, 254
——— as opposed to malformation, 256
Hermaphroditism, true, cytogenetics, 207
Hibernation, activity during, 9
— arousal from, 11
— in mammals and birds, 9
— onset, 10
— radiosensitivity during, 70

HILL, J. R.: Reaction of the new-born animal to environmental temperature, 164
HOLT, S. B.: Quantitative genetics of finger-print patterns, 247
HOLZEL, A.: Galactosaemia, 213
Hormones, exogenous, effects on developing foetus, 92
— in hypothermia, 56
Horvath, S. (editor): *Cold injury*, 77
HUGGETT, A. St G.: Carbohydrate metabolism in the placenta and foetus, 122
Hyperglycaemia in hypothermia, 57
Hypophosphatasia, 225, 226
Hypothermia, *see also* Cold
— central nervous system in, 61
— effects on radiosensitivity, 70
— experimental, 43
— hormones in, 56
— *Hypothermia in surgical practice*, 76
— induced, and extra-corporeal circulation, 35
—— circulation in, 48
—— immersion, management of, 34
—— profound, in cardiac surgery, 37
—— technique, 32
— introduction to symposium, 1
— metabolism in, 52
— perfusion, with pump oxygenator, 43
Hypoxia, effect on new-born animal, 166

Immunity, passive, transmission across foetal membranes, 96
Immunological tolerance and paralysis, 102
Infant, new-born, blood pressure, 154
—— common causes of death, 168
—— lung inflation, 162
—— mineral metabolism, 134
—— *Physiology of the newborn infant*, 175
—— practical problems, 168
—— respiration, 160
— premature, care of, 170
Inheritance, multifactorial, 241
— polygenic, 241
Intelligence, resemblances between relatives, 243
Isoniazid metabolism, genetic differences, 237

CONTENTS OF VOLUME SEVENTEEN

NUMBER 1. *Hypothermia and the Effects of Cold*

Scientific Editor: A. S. PARKES

		PAGE
Introduction	*O. G. Edholm*	1
Resistance of poikilothermic animals to cold	*R. W. Salt*	5
Hibernation in mammals and birds	*L. Harrison Matthews*	9
Local cooling in man	*R. H. Fox*	14
Physiological effects of continued cold on animals and man	*J. S. Hart*	19
Biochemical changes in exposure and acclimation to cold environments	*F. Depocas*	25
The technique of induced hypothermia	*I. K. R. McMillan & E. S. Machell*	32
Profound hypothermia in cardiac surgery	*C. E. Drew*	37
Notes on Contributors		74
Experimental deep hypothermia	*J. R. Kenyon*	43
The circulation in hypothermia	*K. E. Cooper*	48
Metabolism in hypothermia	*H. Barrie Fairley*	52
Hormones in hypothermia	*W. G. Bigelow & S. Sidlofsky*	56
The central nervous system in hypothermia	*W. M. Lougheed*	61
The effect of temperature on the response to drugs	*J. H. Burn*	66
Sensitivity of hypothermic mammals to *x* irradiation	*L. Weiss*	70
Book Reviews		76

NUMBER 2. *Foetal and Neonatal Physiology*

Scientific Editor: K. W. CROSS

Introduction	*R. A. McCance*	79
Histology of the placenta	*E. C. Amoroso*	81
Foetal endocrinology	*R. Deanesly*	91
Protein transfer across the foetal membranes	*W. A. Hemmings & F. W. Rogers Brambell*	96
Immunological tolerance and immunological paralysis	*N. A. Mitchison*	102
Transport mechanisms in the foetus	*W. F. Widdas*	107
The foetal kidney	*D. Pauline Alexander & D. A. Nixon*	112
Enzymic activity during early development	*Derek Richter*	118
Carbohydrate metabolism in the placenta and foetus	*A. St G. Huggett*	122
The inferior aortico-pulmonary glomus	*J. D. Boyd*	127
Notes on Contributors		173
Mineral metabolism of the foetus and new-born	*R. A. McCance & E. M. Widdowson*	132
Glycogen reserves and their changes at birth and in anoxia	*Heather J. Shelley*	137
The ability of young mammals to withstand total oxygen lack	*Joan C. Mott*	144
Changes in the circulation at birth	*G. S. Dawes*	148
Blood pressure in the new-born baby	*Maureen Young*	154
Respiration in the new-born baby	*K. W. Cross*	160
Reaction of the new-born animal to environmental temperature	*June R. Hill*	164
Practical problems of neonatal paediatrics considered in relation to animal physiology	*J. A. Davis & J. P. M. Tizard*	168
Book Reviews		175

NUMBER 3. *Human Genetics*

Scientific Editor: ALAN CARRUTH STEVENSON

Introduction	*Sir Robert Platt*	177
Human cytogenetics	*C. E. Ford*	179
Mongolism	*L. S. Penrose*	184
Inherited variations in leucocytes	*William M. Davidson*	190
Indirect assessment of number of X chromosomes in man, using nuclear sexing and colour vision	*Bernard Lennox*	196
Turner's syndrome and allied conditions: clinical features and chromosome abnormalities	*P. E. Polani*	200
Cytogenetics of abnormal sexual development in man	*D. G. Harnden & Patricia A. Jacobs*	206
Galactosaemia	*A. Holzel*	213
Notes on Contributors		260
Inherited variations of human plasma proteins	*H. Harris*	217
Aminoaciduria	*L. I. Woolf*	224
Pseudo-cholinesterase	*H. Lehmann, E. Silk & J. Liddell*	230
Pharmacogenetics	*David A. Price Evans & C. A. Clarke*	234
Multifactorial inheritance in relation to normal and abnormal human traits	*J. A. Fraser Roberts*	241
Quantitative genetics of finger-print patterns	*Sarah B. Holt*	247
The inheritance of congenital pyloric stenosis	*C. O. Carter*	251
Frequency of congenital and hereditary disease, with special reference to mutation	*Alan Carruth Stevenson*	254
Book Reviews		262
